epionce ESSENTIAL RECOVERY KIT

POST- PROCEDURE CARE FOR OPTIMAL BENEFITS

GET CLINICALLY PROVEN POST- PROCEDURE RESULTS

Proper post-care is essential following moderate to deeper skin rejuvenation procedures—including chemical peels, microneedling, and both ablative and non-ablative laser treatments—to achieve optimal aesthetic outcomes. The Epionce Essential Recovery Kit offers a convenient, at-home regimen designed to rapidly restore hydration while soothing and calming sensitized skin during the critical healing phase.

KEY BENEFITS: Hydrates + Soothes + Calms

- **All- in- one take home kit optimizes the skin post-procedure and helps repair the barrier**
 - Gently cleanses compromised and sensitive skin without over drying or irritating
- **Milky Lotion Cleanser**
 - Primes and preps skin for extra hydration; helps reduce stinging
- **Priming Oil**
 - Primes and preps skin for extra hydration; helps reduce stinging
- **Renewal Calming Cream**
 - Calms, soothes and hydrates very dry, sensitized skin; helps restore skin barrier function
- **Enriched Firming Mask**
 - Hydrates and helps visibly calm redness post- procedure

Directions for Use (Suggested Regimen only. Followed all instructions as directed by your physician or skincare professional.)

- **DAY 1** (First 24 hours)
 - Apply 2-4 pumps of Priming Oil followed by a generous application of Enriched Firming Masks as needed throughout the day to keep skin hydrated.
- **DAY 2-3**
 - Cleanse face with Milky Lotion Cleanser. Apply 2-4 pumps of Priming Oil followed by a generous application Of Renewal Calming Cream as needed throughout the day to keep skin hydrated. For additional hydration, apply Enriched Firming Mask on top of Renewal Calming Cream
- **DAY 4**
 - Cleanse face with Milky Lotion Cleanser. Apply Renewal Calming Cream as needed. Continue to layer Priming Oil and/or Enriched Firming Mask as needed. Apply SPF 50 before sun exposure with frequent reapplication.
